LLM Agent Benchmarks and Primary-Source Evaluation Suites

TL;DR

Several benchmarks and evaluation suites exist for LLM agents, including HELM, HuggingFace Open LLM Leaderboard, and specialized benchmarks like PPTC-R.

Key Findings

1. HELM is a holistic framework for evaluating foundation models across many scenarios [1].
2. HELM evaluates accuracy, calibration, robustness, fairness, bias, toxicity, and efficiency [1].
3. The HuggingFace Open LLM Leaderboard ranks open-source LLMs across several benchmarks [4].
4. Specialized benchmarks for evaluating LLMs exist, including PPTC-R [7].
5. Unified benchmarks for multi-agent LLM frameworks exist [3].

Open Questions

- What are the specific categories of tasks evaluated by HELM?
- What are the details of the benchmarks used in the HuggingFace Open LLM Leaderboard?
