LLM Agent Benchmarks and Primary-Source Evaluation Suites

TL;DR

A research paper titled 'Learning From Failure: Integrating Negative Examples when Fine-tuning Large Language Models as Agents' is available on arxiv.org.

Key Findings

1. There is a research paper titled 'Learning From Failure: Integrating Negative Examples when Fine-tuning Large Language Models as Agents' on arxiv.org. [1]

Sources

1. <http://arxiv.org/abs/2402.11651v2>

Open Questions

- What are the main findings of the paper 'Learning From Failure: Integrating Negative Examples when Fine-tuning Large Language Models as Agents'?
- How does the paper propose to integrate negative examples when fine-tuning large language models as agents?
